BRIEF INFORMATION ABOUT THE ACTIVITY (Criteria No:)

TOPIC/SUBJECT OF THE ACTIVITY	Certificate Course on EVIDENCE BASED TOXICOLOGY
OBJECTIVES	To equip learners with the knowledge and skills to critically evaluate toxicological evidence, assess risk, and make informed decisions in the field of toxicology.
METHODOLOGY	Power Point Presentation
OUTCOMES	By the end of the certification course, participants should have the tools to integrate evidence-based methodologies into their professional toxicology practice, improving safety standards and fostering scientifically sound decisions.

Certificate Course

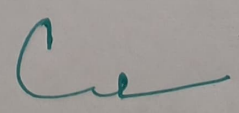

Title: EVIDENCE BASED TOXICOLOGY

Syllabus

Duration: 72 Hours

Sl. No	Modules	Contents	Hours
1.	Fundamentals of Toxicology	Basic principles of toxicology, including dose-response relationships, mechanisms of toxicity, and toxicokinetics.	9
2.	Toxicological Risk Assessment	Methods for assessing human health risks from chemical exposures, including hazard identification, dose-response assessment, exposure assessment, and risk characterization.	9
3.	Critical Appraisal of Toxicological Studies	Evaluating the quality and reliability of toxicological studies, including experimental design, data analysis, and interpretation of results.	9
4.	Regulatory Toxicology	Understanding regulatory frameworks and guidelines for chemical safety assessment and risk management.	9
5.	Environmental Toxicology	Assessment of the impact of pollutants on ecosystems and human health.	9
6.	Occupational Toxicology	Evaluation of workplace exposures and health risks associated with occupational chemicals.	9
7.	Clinical Toxicology	Diagnosis and management of poisoning cases.	9
8.	Emerging Issues in Toxicology	Exploring new challenges in toxicology, such as nanotechnology, endocrine disruptors, and emerging contaminants.	9

Report

Krupanidhi College of Pharmacy (KCP) had organized the 72 hours certificate course on title " **EVIDENCE BASED TOXICOLOGY** " from 17/01/2022 to 03/02/2022 for 3^{rd,4th} and 5th Year **pharm D** Students. An Evidence-Based Toxicology certification course provides participants with critical skills to assess and utilize toxicological evidence effectively. This knowledge supports advancing safe and effective practices in toxicology, benefiting public health and regulatory science. The resource person provided in detailed knowledge on Evidence-Based Toxicology (EBT) Certification Course, and importance regarding design process to enhance the knowledge and application of evidence-based principles in toxicological practices. The program integrates systematic review techniques, critical appraisal of scientific data, and application of evidence to improve decision-making in toxicology.

Upon completion, participants understood and applied evidence-based practices in toxicology, Conducted systematic reviews and critically appraised toxicological studies and planned to implement evidence-based approaches in professional practices.

Evaluation Sheet

Certificate Course on EVIDENCE BASED TOXICOLOGY

Student Name: _____ Date: _____

1. What is the primary goal of toxicological risk assessment?
 - a) To identify all potential toxic substances.
 - b) To estimate the likelihood of adverse health effects from chemical exposure.
 - c) To eliminate all toxic substances from the environment.
 - d) To develop new toxicological testing methods.
2. Which of the following is NOT a key component of a toxicological study?
 - a) Exposure assessment
 - b) Dose-response assessment
 - c) Hazard identification
 - d) Risk management
3. What is the most important factor in determining the toxicity of a chemical?
 - a) The chemical's molecular weight.
 - b) The chemical's physical state.
 - c) The dose of the chemical.
 - d) The chemical's solubility.
4. What is the role of critical appraisal in evidence-based toxicology?
 - a) To identify biases in toxicological studies.
 - b) To assess the quality of toxicological evidence.
 - c) To interpret the results of toxicological studies.
 - d) All of the above.
5. What is the primary goal of regulatory toxicology?
 - To develop new toxicological testing methods.
 - To protect human health and the environment from chemical hazards.
 - To enforce environmental regulations.
 - To conduct toxicological research.
