REPORT ON WALK AGAINST DRUG ABUSE-10TH NOVEMBER 2018

The incidence of drug abuse among children and adolescents is higher than the general population. This is notably because youth is a time for experimentation and identity forming. In India an NGO revealed that 63.6% of patients coming in for treatment were introduced to drugs at a young age below 15 years. There are very few health centers that deal with child abuse problems, especially in the rural areas. The use of tobacco is another major concern among children.

To tackle the above issue a **walk against drug abuse** was organized by the **Ministry of Youth Empowerment and Sports, Government of Karnataka in association with Bangalore City Police** at St. Joseph's Indian High School ground opposite to UB city, Bengaluru.

180 students accompanied by the staff members from **Krupanidhi College of Pharmacy** participated in the walk against drug abuse to create awareness amongst the public of Bengaluru.

International Yoga Day- 21st June 2019

“Yoga is the journey of the self, through the self, to the self”

On the occasion of International Yoga Day 2019, series of yoga sessions were organized by Krupanidhi College of Pharmacy for the students as well as teaching and non teaching staffs on 21 st June 2019 in the college premises. The yoga sessions were facilitated by a trainer from Swami Vivekananda Yoga University, Bangalore. The program started with some breathing exercises and some Asanas (yoga postures) were taught for incorporation into daily life to maintain healthy living.

Around 300 students and 45 staffs participated in the rejuvenating yoga sessions which were appreciated by all.

REPORT ON HEALTH SURVEY ON DIABETES AND HYPERTENSION

Krupanidhi College of Pharmacy (KCP) organized a health survey program for the villagers of Mullur in collaboration with RGUHS NSS cell from KCP on 26th february 2019.

The main objective of the health survey was to create an awareness about the the most common conditions of the present era that is DIABETES and HYPERTENTION.

The health survey also involved the collection of the data about the immunization status of children born in past 5 years and also the cleanliness maintained in and around there homes of villagers.

The NSS volunteers visited the households in the village, enquiring about families with children less than five years of age and the people having hypertention and diabetes. The parents with children under 5 years of age were enrolled into the survey along with diabetic and hypertensive patients. The volunteers checked the immunization cards of the children (as and when available) to ensure completeness of immunization schedule. All the parents were verbally informed on the importance of immunization and were also given leaflets advocating the importance of child vaccination and the diseases against which government provides free vaccines to the children.

The volunteers even checked the medicine, health report and daily schedules of diabetic and hypertensive patients.

The following data was obtained upon survey -

- Total number of houses surveyed:360
- Number of nuclear houses:314
