

Teachers Feedback – AY 2016 -17

Pharm D – Pharmaceutical Analysis (T&P)

Total Responses: 20

Specific comments of Concern:

Practical Class boring and tedious: Since the length of the class is longer and test is conducted every class one student has complained likewise,

Suggestions for Making the class more interesting:

- Giving out clinical examples of Pharmaceutical analysis
- Teaching subject with DM & PK examples where the students can relate the subject more with their core competence
- Class taught with PowerPoint® and where required Flash and gif animation to make the instrumentation easy
- Giving elaborate examples with industrial application of analytical techniques to make them appreciate the subject matter better.

Specific areas of concern:

As this subject has a slight different objective and has different subject matter than the other subjects taught in the 3rd yr curriculum the students have minor difficulties in orienting towards this subject.

Dr. R. S. Ramamouli R

TEACHER'S FEEDBACK FORM
